

Appraisal operations

Time-saving tips

[Request a demo](#)

- Simplify your vendor management workload into one dashboard for all vendor profiles with license and coverage details at a glance
- Invite new appraisers to join your panel when you need them in just a few clicks
- Automatically include your instructions for every order, on a per-product basis so you always get what you need the first time
- Keep staff and vendors in the loop automatically with live status updates that let you avoid all the status questions
- Eliminate extra steps and wasted time with revision request cycles and get revised reports back faster
- Get orders assigned to the ideal appraiser for each job automatically, according to your criteria and weighted priorities
- Easily send messages and updates to all your vendors from one dashboard
- Automatically verify vendor licenses daily against the government's database and sending alerts for expired licenses
- Use a software integration so production staff can enter appraisal orders and check status from directly inside their LOS
- Automatically alert appraisers when payment has been made so you avoid status calls and emails
- Enjoy direct integrations to UCDP and FHA's new EAD portal for faster submission and revision request processing with your vendors
- Get a secure, compliant eDelivery process to automatically send reports to the borrower instead of expensive and time-consuming snail mail
- Streamline your work queue with automatic filters so orders needing your attention are seen first

See the solution used by more than 700 lenders and AMCs.
